

City of Edgewood

4a) Description of Internal Coordination Mechanisms.

The City of Edgewood has approximately 20 staff members, excluding the Police Department. All staff members work within the same building. Most staff work within the same open office space separated by cubicle walls. The Public Works staff and the Planning Department staff work together on projects on a daily basis. Due to the small size of the City workforce and are continual interaction, the City has not needed to formalize coordination mechanisms that would eliminate barriers to permit compliance. At this time, the City is unaware of any internal barriers that would create a compliance issue with our current NPDES Permit.
